

Expedite mission critical medical image sharing to
increase physician loyalty and gain market share

intelemage[®] provides secure and compliant solutions that facilitate the exchange of mission-critical medical images among thousands of hospitals, physicians and medical device companies.

A Fortune 500 medical device company has noted:

“ Using the inteleGRID[®] has helped build market share and has increased the value and efficiency of our company. We are delighted to have the Intelemage team as a strategic technology partner. ”

inteleGRID[™]

inteleGRID[®], the patent-pending flagship platform from Intelemage, globally connects your organization to the hospitals and physicians you serve using secure and compliant technology solutions, including local and mobile applications.

Your custom configured inteleGRID Portal will facilitate timely collaboration between you and your physician customers. Your data resides in the Intelemage secure and private cloud – no servers or capital outlay to worry about.

Benefits of getting on the inteleGRID™

- Automate the exchange of medical images among key decision makers during patient qualification, pre-operative consultations, and pre-surgical planning
- Access medical images through a variety of platforms including PC, Mac, and mobile devices
- Electronically and compliantly access medical images directly from any hospital PACS
- Create a custom configured portal using the inteleGRID's advanced workflow toolset and image management capabilities
- Eliminate delays caused by physical CD delivery and handling

The value we deliver every day

Intelemage creates value in the marketplace by building loyalty between medical device companies and physicians. Its ease of use minimizes training and maximizes adoption rate among medical staff.

Sales and Field Team

The inteleGRID® will make the acquisition and management of medical images easy, fast, intuitive and painless, bringing physician collaboration to a whole new level.

Sales and Marketing Executives

Intelemage solutions will build physician loyalty, facilitate physician training programs and provide real-time view into field staff activity, while lowering overall costs.

Research and Development Personnel

Utilize the validated inteleGRID clinical trial platform to support in-house managed research activity. Create a valuable corporate asset utilizing the inteleGRID Image Library module by storing and indexing medical images for future use, regardless of source.

Quality Control Personnel

Link post-approval device complaints to a patient's pre-surgical images, providing the ultimate in quality review support.
