

Quality Control Team

Link post-approval device complaints to a patient's pre-surgical images, providing the ultimate in quality review support.

- Provide an inteleSEND link on your company website to support the submission of medical images and related data from any client location
- Configure a unique complaint management workflow to support reviews and assessments by internal or external reviewers
- Link pre and post surgical images to a complaint for a more comprehensive view of the event
- Enhance the timeliness and quality of feedback and training provided to field team members
- Save time and money, and eliminate the need to burn and mail CDs

Sales & Marketing Executives

Intelemage solutions will increase your market share, lower your overall costs, and provide increased visibility into sales activity.

Build market share by developing deeper and more meaningful relationships with surgeons and specialists:

- Simplify and speed patient qualification
- Provide high-quality, easily accessible physician training
- Support physician customers with timely access to expert proctors and consultants
- Shorten the sales-cycle
- Improve field staff training and knowledge base
- Strengthen consistency of product presentation across physician customer base

Lower your overall medical image management costs:

- Reduce field-staff travel time to acquire and review medical images
- Eliminate shipping and handling charges
